Dear Dr Pascual Chiago

While reviewing recent literature in the field, your work entitled "**Obstetric Paradoxes and Didactic Equations: The Impact of Mathematical Teaching on Childbirth and Beyond**" was identified as pertinent to themes under consideration.

I am overseeing the academic program planning for a gynecology and obstetrics meeting scheduled for May 2026 and am currently consulting with researchers to understand areas of scholarly focus.

May I inquire whether this topic aligns with your present academic interests and whether you might be open to a brief academic exchange?

If this subject does not fall within your current areas of study, you may disregard this email without any obligation.

Kind regards,  
Roslin Martin
